Re: Dubber Selected by UK Telecommunications Provider AVC One for Call Recording

On June 6th 2016, Dubber announced that it had been selected by UK telecommunications service provider AVC One to provide call recording services for its channels and customers.

By request of the ASX, Dubber would like to provide further information to supplement the announcement.

Dubber must maintain confidentiality regarding its pricing structures, for commercial reasons, as a wholesale provider in a competitive global market.

Pricing is determined by a number of factors including, but not limited to, potential volumes of users, specific requirements and, where applicable, tailored solutions.

As announced, Dubber was asked to provide a solution which satisfied specific requirements from one customer of the AVC channel and, as a result, anticipates revenues of circa AUD \$20,000 + per month within 12 months.

The service has already been connected to AVC's Broadsoft Unified Communications platform.

About Dubber

Dubber is the world's most scalable call recording service that enables telcos and customers to think about capturing voice data in a way that they have never previously considered. A true native cloud platform, Dubber is revolutionising the call recording industry. Its high availability, unique total scale and true Software-as-a-Service (SaaS) offering enable telecommunications carriers and customers to implement and manage recordings as never before without the need for hardware or capital expenditure.
